ELECTRICAL CONDUCTIVITY OF ALUMINUM
ELECTROLYSIS BATHS ON THE BASIS OF FUSED
CRYOLITE. [1963] [25p] 4refs

Order from SLA \$2.60

63-20451

Trans. of Aluminio (Italy) 1950, v. 19, p. 215-224.

DESCRIPTORS: *Cryolite, Fused materials,
*Aluminum, Industrial production, Electrolysis,
Electrical conductance.

It is shown that the conductivity of the cryolite,,
at constant temperature, decreases linearly with
increasing Al_2O_3 con. etc. From this fact one can
deduce that the Al_2O_3 functions as an undissociated
inert solvent for the cryolite, which is the completely
dissociated solute to which the electrical conduc-
tivity of the fused mixture is due. (Author)
